CAREER OBJECTIVE

QA Automation Engineer | QA Engineer | Test Automation Engineer | SDET | Test Automation

PROFESSIONAL SUMMARY

I work as a **QA Automation Engineer** with strong experience in **test automation**, **API validation**, **test framework development**, and integration with **CI/CD pipelines**. I have solid experience developing scalable solutions to increase testing efficiency, reduce manual effort, and improve software reliability.

I work with technologies such as **Python**, **JavaScript**, **TypeScript**, **Java**, **Robot Framework**, **Cypress**, **Selenium**, **Playwright**, **TestComplete**, **Postman**, **Newman**, **Appium**, as well as environments involving **Docker**, **Linux**, **Nginx**, **Bitbucket**, and reporting with **Allure Reports**. My profile combines technical expertise, process organization, and the ability to promote automation practices within teams, supporting increased test coverage and greater predictability in software deliveries.

TECHNICAL SKILLS

Python, **JavaScript**, **TypeScript**, **Java**, **Robot Framework**, **Cypress**, **Selenium**, **Playwright**, **TestComplete**, **Protractor**, **Postman**, **Newman**, **Appium**, **Docker**, **Linux**, **Nginx**, **Bitbucket**, **CI/CD Pipelines**, **Jira**, **Xray**, **Allure Reports**, **Regression Test Automation**, **API Validation**

KEY ACHIEVEMENTS

Among my main achievements, I reduced manual regression testing time from **4–6 hours to approximately 1 hour** by creating a desktop automation solution. I also built an automated pipeline to run the full test suite and publish results on a **Linux server with Nginx**.

Additionally, I developed a **Python project** to configure automated environments on virtual machines and enabled the adoption of automation by multiple QA professionals through training and framework design.

I also significantly improved visibility and debugging processes through **Allure Reports dashboards**, strengthening the technical maturity of the QA process.

PROFESSIONAL EXPERIENCE

Contmatic Phoenix | Quality Assurance Engineer | 02/2021 – 03/2026

- Designed, maintained, and evolved **test automation frameworks**, expanding test coverage and improving the efficiency of the testing process.
- Developed automated regression tests for desktop applications, reducing manual testing time and increasing validation predictability.
- Structured **CI/CD pipelines** for executing automated test suites and publishing results.
- Created **Python tools** for automated test environment configuration on virtual machines.

EDUCATION

Bachelor's Degree in Information Systems – Uninove – 2018 to 2022.

LANGUAGES

English – Intermediate.
